Urban Resilience and Adaptation for India and Mongolia:

Curricula, capacity, ICT and stakeholder collaboration to support green & blue infrastructure and nature-based solutions

"This course will be Offered to all Postgraduate Students in the II Semester"

Revised Course: LANDSCAPE ECOLOGY AND PLANNING

The main course objective is to make the students in-depth understanding of the concepts and salient features of Landscape ecology.

Students will get an overview of the field along with current concepts, methods, and applications of landscape ecology. With handson training on quantitative tools of landscape ecology, field-related projects and reading writing assignments will enable students to develop or apply these tools and concepts in their studies and/or research.
